Summary

Full-stack developer and indie hacker based in Lomé, currently in the final year of a Bachelor's in AI & Big Data. I design and operate SaaS products in production end to end — database, API, UI, billing — and build open-source tooling for AI agents in Python. 31 pull requests across 8 open-source repositories, including Medusa, Flowise, Directus, PostHog, Saleor and Dify. Autonomous and delivery-focused.

Experience

Indie Hacker & Full-Stack Developer, Self-employed – Lomé, Togo (remote) Nov 2024 – present

Designed, built and operate five commercialized products, from architecture to billing.

- Quotask — freelance quoting SaaS: PDF generation, proposal templates, e-signature, Stripe and Lemon Squeezy payments. Next.js 16 (App Router, RSC), Drizzle ORM, Turso.
- LandlordKit — rental management SaaS: tenant portal, recurring Stripe rent collection, lease expiry alerts, analytics dashboard. Next.js 16, Drizzle, Neon, Resend.
- TradeQuote — quoting SaaS: PDF export, item templates, company profile, configurable VAT, online accept/decline by the client. Next.js 16, React 19, Drizzle, Neon.
- XEARN — pan-African digital micro-earning platform built as a monorepo: over 40 API endpoints, 99 automated tests, gamification, admin panel. NestJS 11, Next.js 15, Expo.
- Workless — self-hosted open-source workflow engine: React Flow visual builder, DAG execution engine, webhooks, scheduling. An alternative to Zapier / Make / n8n. Laravel 11, Next.js 15, PostgreSQL, Redis.
- Freelance engagements (Upwork, Fiverr) — technical and UX/UI audits of hotel group websites in Lomé (Sarakawa Hotel, Hôtel 2 Février): web performance, layout fixes and API corrections.

Contributor, Open-source ecosystem – GitHub (remote) June 2025 – present

31 pull requests opened against 8 external repositories, 9 merged — targeted fixes in codebases I had no prior familiarity with.

- hermes-browser-extension — 6 merged PRs: surfacing subagent batch results after the turn stream ends, model picker correctness, activating the context-cache plugin, /meta command and CSS polish.
- Medusa — merged PR: handling deleted stock locations in the admin order fulfillment section.
- Flowise — 5 PRs: pinning the Docker image version to the release tag, direct variable names in overrideConfig, full RediSearch special-character escaping, duplicate chatflow creation on rapid save clicks.
- Directus, Saleor, PostHog, Dify — primary-key deduplication in the permissions count check, blocking account reactivation after staff deactivation, UTC timestamps on the /events endpoint, consistent created_at/updated_at timestamps.

Projects

Hermes Project Oracle Mar 2026 – present

Deep project scanner for the Hermes AI agent — analyzes a codebase and generates AGENTS.md and CLAUDE.md context files plus structured Obsidian documentation notes.

- Python, agent plugin integration, structured documentation generation.

memory-vault May 2026 – present

Portable Context Protocol — packages AI agent sessions into reusable .hermes-memory packs, so context can travel between models and machines.

- Plugin v0.2.0: 6 exposed tools, real-time webhook, scheduled cron export.

Skills

Languages: TypeScript, JavaScript, Python, SQL, Java, PHP, HTML/CSS
Frontend: React 19, Next.js 16 (App Router, Server Components), TailwindCSS, Vite
Backend: Node.js, NestJS 11, Express, Spring Boot 4, Laravel 11, REST APIs
Data: PostgreSQL, Neon, Turso/SQLite, Drizzle ORM, Prisma, Redis, UML modelling
Payments: Stripe (subscriptions, webhooks), Lemon Squeezy
AI & agents: LLM integration, tool calling, RAG, MCP, agent plugins, machine learning fundamentals
DevOps: Docker, GitHub Actions, CI/CD, monorepos, Vercel, Railway, Oracle Cloud, Cloudflare Workers, Linux/Bash, Git

Education

Ascencia Keyce Togo (Africa Campus, Lomé), Bachelor's (3rd year) in Artificial Intelligence & Big Data – Lomé, Togo Sept 2026 – present

- Currently enrolled — AI and big data specialization.

Collège de Paris Supérieur, Two-year programme in Computer Science & Software Engineering – Lomé, Togo Sept 2023 – June 2025

- Algorithms, relational databases and SQL transactions, written and oral communication techniques.

Baccalauréat série C, Mathematics & Physics Obtained 2023

Languages

French (native). **English** (professional: open-source contributions, technical documentation, discussions).
